SENIOR LIFECYCLE MARKETING MANAGER | ACTIVATION, RETENTION & LIFECYCLE SYSTEMS

PROFESSIONAL SUMMARY

Lifecycle marketing leader with 12+ years owning activation, retention, and winback across fintech, B2B agency and media, and regulated gaming, plus the CRM, web, and data systems behind them. Brought in when a growth problem crosses teams with no single owner: find where it breaks, prove it with one metric, build the system, document it. Lifted Intelligent Investing activation from ~24% to ~38% by treating non-activation as unresolved trust, and activated or reactivated ~54K Intelligent Investing users from a dormant and lending-only base.

CORE CAPABILITIES & PLATFORMS

Lifecycle strategy: Activation and onboarding · Retention and churn prevention · Winback and cross-sell · Behavioral segmentation · Trigger and event architecture · Deliverability · Compliance-aware messaging · Experimentation

Platforms and channels: Braze · Salesforce Marketing Cloud · Klaviyo · HubSpot · Iterable · Campaign Monitor · Intercom · Email, push, SMS, in-app

Data and systems: Snowflake · Microsoft Dynamics · GA4 · Google Tag Manager · Branch · Webflow · n8n · Zapier · SQL · Event taxonomy and attribution

PROFESSIONAL EXPERIENCE

Senior Marketing Operations Manager, Lifecycle & MarTech

Aug 2024 - Current

Mogo Financial, Vancouver, BC

Own lifecycle strategy and the CRM, web, analytics, and automation layers behind it across Mogo Money and Intelligent Investing; moved the Webflow ecosystem from DevOps into Marketing so web and journeys change together.

- Diagnosed a ~24% activation rate as unresolved trust at bank connection, not forgetfulness, and rebuilt onboarding as a trust-led Braze Canvas: **30-day activation ~24% to ~38%, 7-day drop-off ~78% to ~62%** in two months.
- Built a second activation stage moving bank-connected users to a first trade or weekly contribution: **funded-but-idle users reaching first trade went from ~0% (no prior path) to ~19%, then ~24%**.
- Treated withdrawals as doubt rather than exit and built a two-week triggered journey offering lower, pause, or resume: **90-day retention among withdrawing users ~58% to ~68%, 30-day re-deposit ~12% to ~22%**.
- Added contribution-streak milestones (3, 6, 12 months) to a retention system that had only fired on risk signals: **30-day contribution continuation ~71% to ~82%, post-milestone engagement ~18% to ~34%**.
- Ran a three-iteration winback and cross-sell program for ~900K inactive and lending-only clients, using pass one as baseline and list hygiene: **conversion ~2.7% to ~5%, ~54K activations or reactivations**.
- Rebuilt Braze production on modular components and rebuilt GA4 and GTM with Analytics co-designing the event taxonomy: **build time cut ~75%, tracking accuracy ~40% to ~80%**. Led a COO-sponsored SFMC-versus-Braze evaluation.

Email & Website Operations Manager, MarTech

Apr 2021 - Aug 2024

Pilothouse / DTC Newsletter, Vancouver, BC

Owned lifecycle, deliverability, audience, web, and automation for DTC Newsletter, the B2B lead-generation and authority brand behind growth agency Pilothouse (~300K subscribers), and served as lifecycle SME to Pilothouse account teams across 12 ecommerce brands.

- Traced falling opens and spam placement to shared-IP reputation, not content, and led a 200K+ subscriber ESP migration to Campaign Monitor with full authentication and warming: **sender score from the low 20s to 80+, stabilizing above 90.**
- Reframed a CFO request to "enrich leads" as a speed-to-contact problem and built an AI enrichment and routing pipeline (Zapier, LindyAI, ChatGPT, HubSpot, Slack): **~70% of CRM data pre-filled, 1K–2K sales-ready leads a month.**
- Defined the SOPs and trained the team when Pilothouse launched its lifecycle service in 2023–2024, turning the deliverability and behavioral-trigger playbooks into sellable client offers.
- Read a ~70% bounce rate as a conversion-architecture problem, not a content problem, and rebuilt the Webflow site and SEO structure: **bounce to ~38%, organic traffic +28%, organic newsletter signups +27%.**

Founder & Growth Strategist, Part-Time

May 2022 - Jan 2025

CraftConcepts, Vancouver, BC

Founded a mission-driven B2B marketing collective helping Metro Vancouver small businesses recover digital visibility after the pandemic through at-cost web, lifecycle, and marketing work.

- Scaled from three founders to a 20+ contributor network serving 26 businesses, with standardized intake, scoping, and supervised delivery; **six early-career contributors landed full-time roles within a year.**
- Ran a 30-minute discovery and qualification call on every inquiry, defining scope, platform, and fixed project pricing before staffing delivery, and referred out work the collective could not serve well; **clients owned their finished site or store after handoff.**

Senior Marketing Projects & Operations Manager

Mar 2014 - Feb 2021

Sportserve, Manila, Philippines

Built and led the Payments Operations Division in a hybrid B2B and B2C business: lifecycle and CRM for Dafabet's consumer platforms, and operations and onboarding for a proprietary B2B payments engine, across 12 countries in APAC, Europe, and Latin America.

- Designed Dafabet's lifecycle in Salesforce Marketing Cloud as six journeys built outward from first bet as the activation event, with compliance built into the architecture: **first-bet conversion up ~8–15%, dormant reactivation up ~10–20%.**
- Owned lifecycle for every payment-method launch, designing journeys for declined and newly eligible depositors: **holdout tests showed ~7% higher deposit completion and ~12% higher deposit-to-first-bet conversion.**
- Built a five-person Payments Operations team from fresh graduates and designed the B2B payments engine onboarding system: **launch time from ~2 weeks to ~1, recurring support load ~50% lower.**
